By University Of Texas

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 Excerpt: .the bottom of the rails. The anchors are placed in the concrete about ten feet apart and made of two X734 bolts and XWz tie plates. Between these anchors, which are hung on the base of the rail while the concrete is being placed, standard track spikes (5V2 X 9-16) are spaced two feet apart on alternate sides of the base of the rails. Tie rods (1 XWX5) with a 3 thread on each end, are spaced every six feet. Plate V. shows the tracks at the intersection of Congress Avenue and Sixth Street. The substructure employed on the Avenue is shown in Plate VI. This gives a view of the rails on temporary supports awaiting the filling in of the concrete substructure by the crew just beyond. On the right, this operation is shown completed, the concrete having been brought up and firmly...
