CHAPTER VI THE ORGANISM AND FOCAL CONSCIOUSNESS One great disadvantage that besets our study of conscious psychism is that the only specimen available to direct observation is the most complex and elaborate under the sun. We are in very much the same position in our investigation of psychological dynamics as we should be if we set about the study of physical dynamics and, knowing nothing of the simpler kinds of machines, such as a lever, a wheel, a crank, were compelled to begin our enquiry into mechanical principles by considering, say, a great newspaper printing-machine whirling at high speed, with all its cylinders, cog-wheels, tubular plates, shafts and cranks in rapid and complex motion, and we were to endeavour to formulate our notions of mechanical principles from that. You may well imagine how unsatisfactory the progress of our science of mechanics would be under those circumstances, and how long it would take us to discover, for instance, the simple laws of motion formulated by Galilei and Newton. The extremely complex, composite nature of the only form of psychic machine known to us by direct experience constitutes a serious handicap, and renders us naturally liable to mistake the superficial and incidental for the essential and fundamental, a type of error with which all our psychology is deeply fraught. Hence it is that in order to understand the essential and fundamental features of the operation of psychic act on we have been obliged to refer...
