Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Excerpt: . . . showing the half of the building, which it was estimated could be erected for the sum of 1, 500, 000, the limit of cost first established. Following are the extracts from the report prepared by the assistant secretary in charge of the Museum: The plan contemplates a rectangular building about 486 feet front by about 340 feet deep and about 80 feet high including the basement. The building is designed for four floors, and will afford a unit 400, (XK1 square feet of floor space, the first and second floors to be used for exhibition, the basement and upper floor for storage, workrooms, and other purposes necessary to the conduct of a museum. It could be erected in substantial form as a fireproof building for a sum not exceeding 3, 000, 000. The plan has been designed in such a manner that approximately one-half of the building could be constructed at once, presenting the appearance of a completed building and suitable for the Museum needs. This half would consist of the main or south wing and the middle wing, and is exhibit! in a separate drawing. Whilst it would in no way provide for the growth of the Museum, it would relieve the present congested condition of the exhibition halls, render possible a proper classification of the reserve collections, and remove the necessity of employing any rented buildings. The plan of the building has been drawn after a study of all important existing museums, both...
