

Journal of Botany, British and Foreign, 1896, Vol. 34 (Classic Reprint)

By Henry Trimen

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Journal of Botany, British and Foreign, 1896, Vol. 34 Potamogeton Nitens Weber, forma involuta mihi. Rootstock with stout far-creeping stolons. Stem terete, simple below, much branched above, 1-5 ft. long. Lower leaves semi-amplexicaul, longitudinally involute, broadest at the base, tapering gradually to the apex, many-ribbed, with coarse often prominent ascending reticulations. Upper leaves coriaceous, lanceolate, elliptical, oval, or spathulate, with flattened petioles equalling or exceeding the lamina, produced singly opposite, or in pairs subtending, the peduncles, abundant on both flowering and barren branches. Stipules persistent, involute, herbaceous or horny, blunt. Peduncles equal, often curved, shorter than the subtending leaves. Flower-spike short, abortive, usually with closed, rarely with open, flowers. Fruit imperfect, compressed, keeled. Whole plant dark green, often with reddish stems. Probably a hybrid between *P. heterophyllus* and *P. perfoliatus*, or between the latter and *P. Zizii*? This *Pontamogeton* grows abundantly in Blackbush Drain and some adjacent ditches near Whittlesea, Cambridgeshire. It is distinguished from all other forms of *P. nitens* hitherto described by its involute stem-leaves, and by its very freely produced coriaceous floating...

Reviews

This is the best pdf i have got go through until now. It is loaded with wisdom and knowledge I discovered this publication from my i and dad encouraged this book to find out.

-- **Aryanna Sauer**

The publication is great and fantastic. I am quite late in start reading this one, but better then never. I discovered this pdf from my dad and i suggested this ebook to discover.
