## SOLUTIONS OF THE CAMBRIDGE SENATE-HOUSE PROBLEMS FOR FOUR YEARS 1848-51

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1851 Excerpt: .order that the centres of the ellipses of contact may be equidistant from the centre of the ellipsoid. Let  $f, 17$ , be the coordinates of the vertex of any one of the cones; then if the ellipse be referred to its centre and axes, the equation to the plane of contact will be  $a + b + c = 1$  The centre of the ellipse of contact will be the intersection of (1) with the straight line joining the centre of the ellipse with the vertex of the cone; its equations are  $x y z t = V = f$  Hence if  $A, k, l$ , be the coordinates of the centre of the ellipse, In order that the centres of the ellipses may be equidistant from the centre of the ellipsoid, we must have  $A + k + P = \text{constant}$ ,  $p$  suppose; the equation to the locus of the vertices. 5. Determine the form of the termination of a honeycomb cell on this principle, that if a sphere which will just pass through the hexagonal transverse section be dropped into the cell, the unoccupied space at the extremity of the cell shall be the least possible. Let  $abc$  (fig. 86) represent half of one of the rhomboidal plates, three of which close each hexagonal cell.  $ABC$  represent the eighth part of a sphere. Then, by the general principle of Envelopes (see Cambridge and Dublin Mathematical Journal, vol. iii. p. 181), the volume in question is least...
