Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from *The Spleen and Anaemia: Experimental and Clinical Studies* In this volume splenectomy is considered, first, as a means of studying experimentally in animals the relation of the spleen to blood destruction and regeneration and, second, as a therapeutic procedure in the treatment of diseases of man accompanied by anaemia. No attempt is made to discuss injuries, infections and tumors of the spleen, or, except incidentally, the problems - leucocytosis and leucaemia - of the white blood-cells. The emphasis is on the side of the red blood-cell and the relation of the spleen to the quantitative and qualitative changes which the red cell may undergo. The chapters on experimental and metabolic observations are based on some twenty odd studies carried out during the past five years in the John Herr Musser Department of Research Medicine of the University of Pennsylvania, and reported from time to time in medical periodicals, under the general title of *The Relation of the Spleen to Blood Destruction and Regeneration and to Haemolytic Jaundice*. These various papers have been rearranged and largely rewritten and brought into relation with the general literature so as to offer a consecutive comprehensive presentation of the general experimental problem. Such experimental studies are obviously of importance in connection with the diseases of man characterized by splenomegaly, with anaemia or jaundice, or both, and in connection with which splenectomy, as a therapeutic procedure, has recently been so widely tried. Clinical studies of the splenomegalies and of the results of splenectomy in man are therefore presented by Dr. Krumbhaar. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is...
