

## Numbering and Measuring in the Classical World (2nd Revised edition)

By William F Richardson

Liverpool University Press. Paperback. Book Condition: new. BRAND NEW, Numbering and Measuring in the Classical World (2nd Revised edition), William F Richardson, This volume introduces the reader to Greek and Roman ways of expressing numbers, weights and measures. These are matters often relegated to footnotes or an appendix. Yet the words, the symbols and the calculations used in the classical world have an interest in themselves and often reveal unexpected facets of the culture that employed them. The subject can be complex but this book seeks to cut it to the essentials and to avoid the aridity of larger, more technical treatments. It offers a fluid and readable text, liberally enhanced with tables and specific examples. Chapters cover the cardinal numbers, other number words, inclusive reckoning, symbols, fractions, simple arithmetic, linear measurements, measuring area and volume, measuring weight, capacity and value; financial matters; sizes of pipes and nozzles; measuring time. It is quite simply an indispensable point of reference for every student of classical culture or of ancient texts.

### Reviews

*This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

*This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).*
