## The Future of Food: Global Reform to Improve the Quality of Food Public Health

By Paul F. Davis

Createspace. Paperback. Book Condition: New. This item is printed on demand. Paperback. 352 pages. Dimensions: 9.0in. x 6.0in. x 0.8in. Food Safety, Disease Prevention, Labeling and GMO Regulation One-third of food produced for human consumption is lost or wasted globally, which if mitigated could reduce the cost of food, poverty and improve global health. The global burden of non-communicable diseases (NCDs) accounts for 36 of the 57 million deaths globally (63) causing cardiovascular diseases, cancers, chronic respiratory diseases and diabetes. NCDs however are largely preventable by altering dietary habits and lifestyle. Nearly 1 in 4 Americans are projected to die from cancer with 1 in 3 developing some form of cancer over their lifetime. The Center for Disease Control reports every year 48 million Americans, 1 in 6, are made sick by foodborne pathogens, 128, 000 are hospitalized, and 3, 000 die from foodborne diseases. A pathway for pathogens, foodborne illness can weaken immunity, cause mental disorders, organ failure (liver and kidneys), and cripple an economy. Two-thirds of adults living in the United States are overweight or obese and about a third of children and adolescents between the ages of 6 to 19 are overweight or obese. The U. S. food...
