Report of the Meeting of the British Association for the Advancement of Science Volume 6

Filesize: 9.53 MB

Reviews

This sort of book is every little thing and got me to searching ahead and a lot more. This can be for all those who statte there was not a well worth reading through. I am just easily could possibly get a delight of reading through a published pdf. (Floy Rolfson)

REPORT OF THE MEETING OF THE BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE VOLUME 6

To read Report of the Meeting of the British Association for the Advancement of Science Volume 6 eBook, make sure you follow the link under and download the document or gain access to additional information which are in conjuction with REPORT OF THE MEETING OF THE BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE VOLUME 6 book.

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1837 edition. Excerpt: .the velocity of sound in free air, and the length, such as it can be observed, of the concameration s that are formed in a flute-tube, is not verified exactly. He hints at some experiments proper for making evident the cause of this discordance, but I am not aware that any such have been published. As this method fails in giving exactly the ratio of the specific heats of atmospheric air, M. Dulong adopts a ratio (viz. 1-421) which he says is the mean of a great number of direct observations made in free air by different observers. I mention this particularly, as it seems to have been supposed that Dulong M. Poisson a excellent Treatise on Mechanics is a work so extensively used that it is desirable to point out any error that may have inadvertently crept into it. I do not therefore scruple to advert to an inaccuracy in p. 716, torn. ii. (2nd ed.), where the author asserts that the ratio 1-421 is deduced from observation of the sound produced by air inclosed in a tube, and endeavours to account for the excess of this value above another derived from the propagation of sound in free air, by the different radiation of heat in the two circumstances. This is contradicted by the assertion quoted above from Dulong s Memoir. sound is propagated in them. obtained this ratio from his own experiments. In the next place he establishes, contrary to an opinion...
